**Subject:** RE: data graphs regarding Gold King release event

FYI,

**Personal Matters/Ex. 6**

I get messages on my phone but limited access to other stuff, I'll be back in an hour or so.

Hi Mark,

I am working on this now and will follow-up with an estimate to Sella ASAP.

If I have any questions, I will contact you this morning.

Thank you,

Mark

**Subject:** FW: data graphs regarding Gold King release event

Amber, Mark

The forwarded message has what I received from Region 9 (Harry Allen), I believe they have their data on a publically available web site as well, which may be more than what is attached.

Harry could use their data being put into the same formate/presentations that were used in Region 8. Harry is interfacing with the Tribes. If this does not make sense or you need additional information please contact me as soon as possible. I am in today but am supposed to be off tomorrow and I believe Harry needs this ASAP.

Please let me know you received this so that I know things are moving forward.

Thank you

mark

**Subject:** RE: data graphs regarding Gold King release event

This looks great – could you do this for Region 9 data as well?

Thank you very much!!

**Subject:** data graphs regarding Gold King release event

Richard et al.

Dan Wall has asked me to send you the most recent set of graphs we have prepared to display the surface water and sediment data collected in association with the Gold King release event.

Included as attachments to this e-mail are:

- 1) “SW and Sediment data 08-18-15 updated v4.xlsx”. This file presents graphs that compare post release values in surface water and sediment with pre-release (“background”) values collected before the release
- 2) “SW Rotary park Time Series.xlsx”. This file plots surface water data collected at the Rotary Park station as a function of time, beginning just before the plume arrived and extending out several days thereafter.
- 3) “Water background levels R1.xlsx” and “Sediment BackgroundR1.xlsx”. These two files were sent to me by Weston. We do not have the raw data. If you need to see the raw data for background, I suggest you contact Jan Christner at Weston

([Jan.Christner@WestonSolutions.com](mailto:Jan.Christner@WestonSolutions.com)), who does have these data available.

ps...Dan asked me to include a fourth individual, Erin Erdiales, but apparently I got the spelling wrong because I could not locate the e-mail for this person on EPA Locator. Please forward.
